

NATURAL RESOURCES INVENTORY

Wetlands and Hydric Soils

Wetlands and Hydric Soils

- NYS DEC Wetlands
- NWI Wetlands
- Probable Wetlands (Hydric Soils)
- Possible Wetlands (Somewhat Poorly Drained Soils)

Hydrology

- blob Water Bodies
- wavy line Streams

Roads

- Interstate
- Federal Highway
- State Route
- County Road
- Local Road

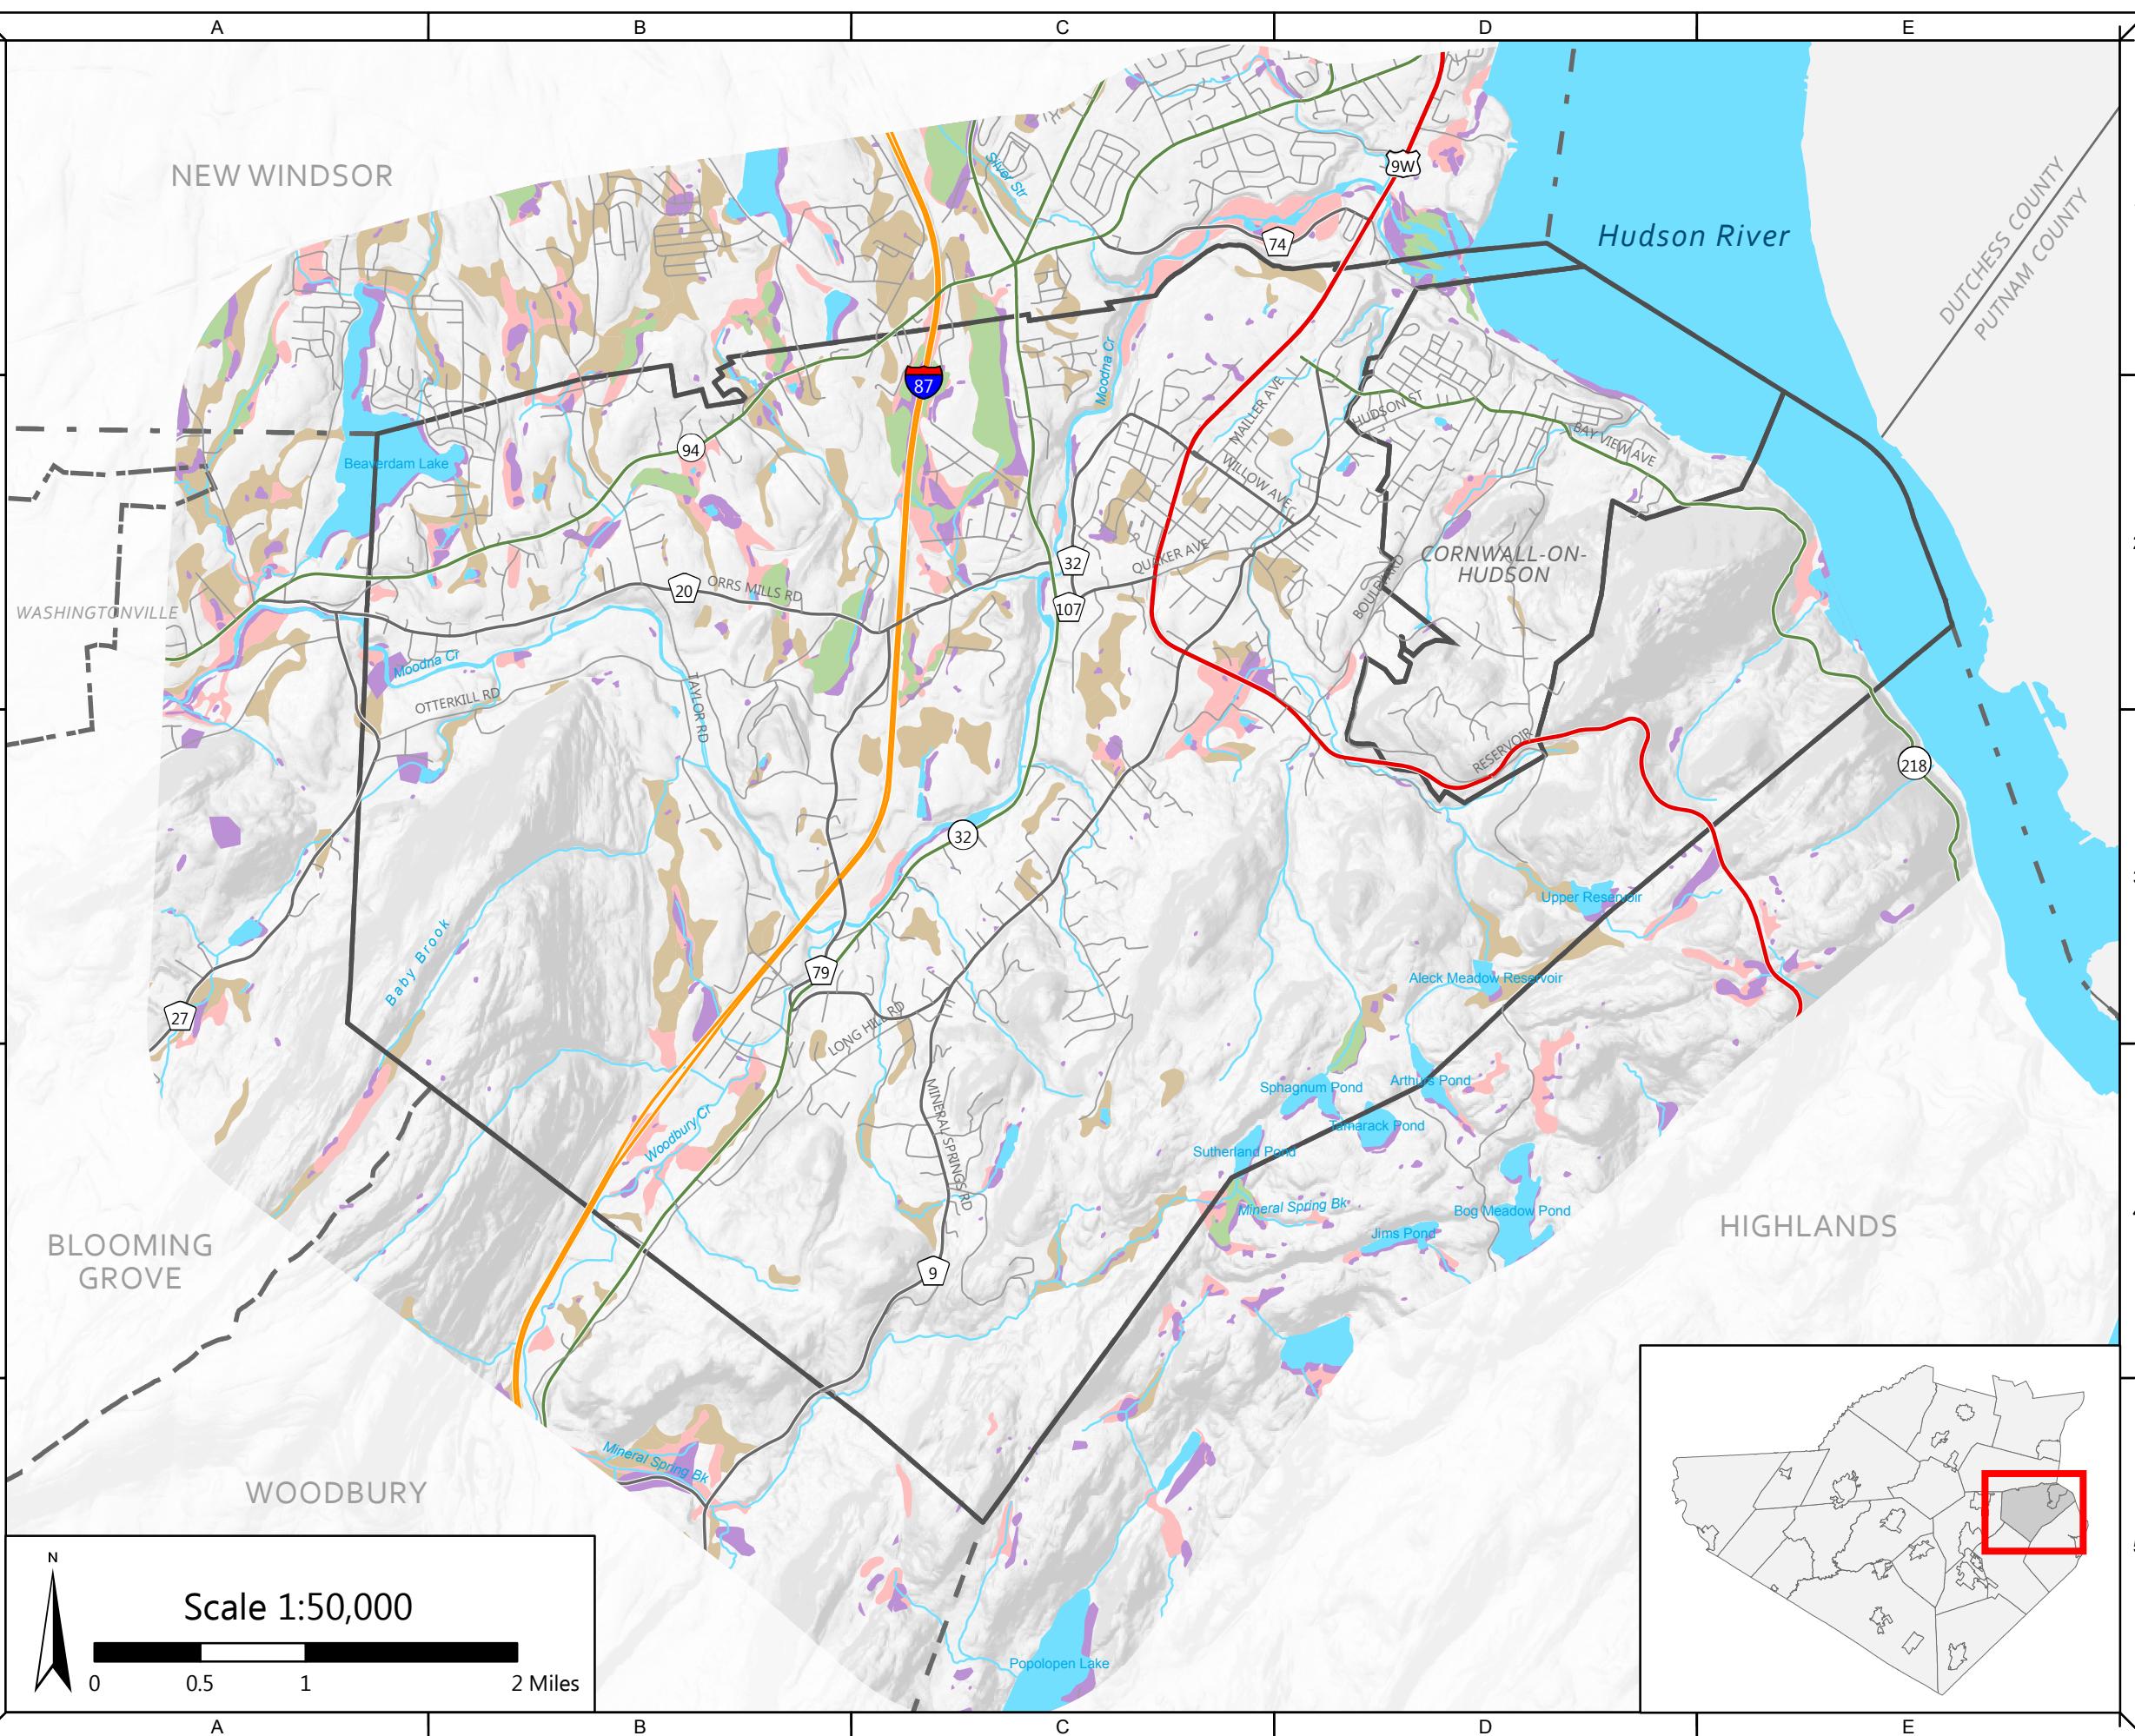

DATA SOURCE: United States Geologic Survey, 2017; New York State Dept. of Environmental Conservation, 2017; National Wetland Inventory, 2017; United States Department of Agriculture, 2017; New York State Dept. of Transportation, 2017; Orange County Dept. of Planning, 2018

This map depicts wetlands delineated by the New York State Department of Environmental Conservation (NYSDEC) and wetlands identified in the USFWS National Wetlands Inventory. Probable and possible wetlands are also shown. These areas were identified based on soil drainage. Probable wetlands consist of hydric soil and possible wetlands consist of somewhat poorly drained soil.

Creating Natural Resources Inventories (NRIs) in Orange County Communities is a partnership project between OCWA and Cornell University Department of Natural Resources, with funding from the Environmental Protection Fund through the New York State Department of Environmental Conservation Hudson River Estuary Program.
